

Ethernet Private Line Service

Flexible Any-to-Any Ethernet Service

Dedicated Private Line Service

Wavelength Service

Managed SONET Ring Service

Internet Connectivity

### What Our Clients Are Saying...

*"As a provider of flexible office space and technical services to emerging companies we require a carrier that can respond rapidly to customer requirements. Verosity has not only met this challenge, but exceeded any of our expectations. Verosity was able to upgrade my IP services within 5 minutes after contacting them. This type of service and support is unheard of in the telecommunications industry."*

- Tim Rowe, CEO  
Cambridge Innovation Center

### End-to-End Path Diversity

For organizations that require dedicated connectivity for mission-critical data transmission, Verosity's Dedicated Private Line Service provides a powerful solution. With this private connectivity, enterprises can connect multiple offices and data centers, instantly transmitting data between locations and supporting any customer application. And with active carrier relationships that enable us to deliver end-to-end connectivity anywhere in the world, Verosity serves as the single point of contact to provision, maintain, monitor and troubleshoot client networks.

### Technology Overview

Verosity's Private Line Service utilizes a SONET network to deliver reliable, dedicated connectivity. Leveraging a facilities-based infrastructure, Verosity enables secure connections between customer locations and supports all networking protocols.

Unique to Verosity is our willingness to build new and diverse fiber connections to customer locations which translates to a robust building list and eagerness to add new locations. And unlike the traditional practice of using intersecting rings to hop customer circuits through single buildings, our Private Line Service uses Path Protection to provide full end-to-end route diversity on every circuit provisioned.

### Private Line Features:

- Flexible interfaces
  - Bandwidth: DS3 (T3), OC-3, OC-12, OC-48, OC-192
  - Media: Coaxial, 2 Fiber, 4 Fiber (APS protection)
- Simplistic, rapid implementation and reconfiguration
- Ubiquitous multi-application support
- Carrier-class SONET and DWDM network infrastructure
- 24x7x365 proactive network monitoring and technical support

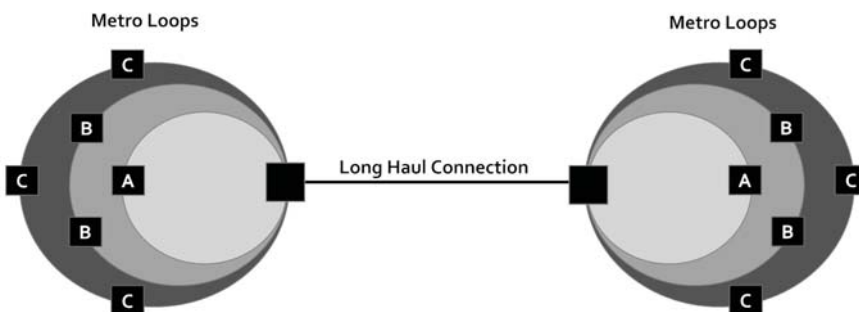

**Our Clients Include:**

- Bain Capital
- Charles River Ventures
- Constant Contact
- Evergreen Solar
- Grantham, Mayo, Van Otterloo & Co. LLC
- Mercury Computer Systems
- MFS Investments
- Nuance Communications
- Shire Pharmaceuticals
- SolidWorks Corporation
- Vertex Pharmaceuticals

**About Veroxity**

Veroxity Technology Partners, LLC is a premier service provider of fiber optic network solutions for companies that require highly available connectivity for data center, storage applications, business continuity and mission-critical data delivery. Through Veroxity's owned and operated worldwide network backbone, The Veroxity Network™, and unique dual POP architecture, the company deploys and manages scalable end-to-end data transport services that ensure diversity and redundancy for organizations that require no interruption in their data communications.

**Traditional Carrier Network**

**Veroxity's Protected Network**
